

What is claimed is:

1 1. A flash unit for a camera, comprising:
2 a bracket disposed inside the camera;
3 a reflecting member disposed inside the bracket;
4 two fixed members integrally formed on the bracket; and
5 a flash emission tube fixedly disposed inside the
6 bracket by the fixed members.

1 2. The flash unit as claimed in claim 1, wherein the fixed
2 members are made of a flexible material.

1 3. The flash unit as claimed in claim 2, wherein the
2 bracket and the fixed members are made of plastic.

1 4. The flash unit as claimed in claim 3, wherein the
2 bracket is provided with two through holes adjacent to the
3 fixed members separately, and an area of the through hole
4 defined by the corresponding fixed member is smaller than a
5 cross-section area of the flash emission tube passing through
6 the through hole.

1 5. A flash unit for a camera, comprising:
2 a bracket disposed inside the camera;
3 a reflecting member disposed inside the bracket;
4 a fixed member integrally formed on the bracket; and
5 a flash emission tube fixedly disposed inside the
6 bracket by the fixed member.

1 6. The flash unit as claimed in claim 5, wherein the
2 bracket is provided with a receiving portion, formed opposite
3 the fixed member.

1 7. The flash unit as claimed in claim 6, wherein the fixed
2 member is made of a flexible material.

1 8. The flash unit as claimed in claim 7, wherein the
2 bracket and the fixed member are made of plastic.

1 9. The flash unit as claimed in claim 8, wherein the
2 bracket is provided with a through hole adjacent to the fixed
3 member, and an area of the through hole defined by the fixed
4 member is smaller than a cross-section area of the flash
5 emission tube passing through the through hole.

1 10. A flash unit for a camera, comprising:
2 a bracket, having two holders, disposed inside the
3 camera;
4 a reflecting member disposed inside the bracket; and
5 a flash emission tube fixedly disposed inside the
6 bracket by the holders.
